

MISS ANANTI INDIA

AI Video Screening Framework - Version 1.0

Engineer Testing Specification | Recorded Video Component

1. Scope and scoring role

Purpose. This document defines how AI should score the recorded video in Round 1. The video contributes 20 marks out of the overall 100. The scoring philosophy is aligned with the frozen Written Screening Framework v1.0: score observable evidence, not appearance, prestige, language polish, or a preferred opinion.

Assessment component	Weight
Written questions	40%
Social presence	20%
Recorded video	20%
MCQ judgment test	15%
Authenticity	5%

Important: The separate 5% authenticity component should remain separate. The video rubric below should not invent an additional hidden authenticity score.

2. Video prompts

1. Introduce yourself - name and city.

2. What are your future goals?

3. Why do you want to be a part of Miss Ananti India?

Name and city are context only. A candidate must not gain or lose merit because of her city, State, profession, education, or background.

3. Final video parameters - 20 marks

Parameter	Max marks	Primary evidence	What earns marks
Self-awareness & identity	3	Introduction + all responses	Communicates who she is beyond basic facts; shows grounded self-understanding.
Goal clarity & direction	4	Future goals	Clear goal, personal motivation, direction, and realistic next steps/current effort.
Purpose for joining Miss Ananti India	4	Why Miss Ananti	Specific reason for joining; understands opportunity, growth and contribution.
Clarity & structure of communication	3	Whole video	Meaning is understandable, relevant and logically organised in any supported language.
Personal specificity & voice	4	Whole video	Uses personal details, motivations or experiences rather than stock pageant phrases.

Parameter	Max marks	Primary evidence	What earns marks
Composure & task engagement	2	Whole video	Completes the task, stays reasonably focused and recovers from normal hesitation.

4. Common evidence scale

Use the same five-level evidence scale as the written framework: 0 / 2 / 4 / 6 / 8. Odd numbers may be used only when evidence genuinely falls between two anchor levels.

Level	Meaning
0	No usable evidence / off-topic / unable to assess.
2	Very limited or generic evidence.
4	Adequate evidence; relevant but not well developed.
6	Strong evidence; clear, specific and meaningfully supported.
8	Exceptional evidence; highly specific, grounded, coherent and well demonstrated.

Conversion formula: Parameter marks = (evidence level / 8) x parameter maximum marks. The backend performs the arithmetic.

5. Detailed parameter criteria

5.1 Self-awareness & identity - 3 marks

Level	Evidence descriptor
0	No usable personal information beyond mandatory identification, or response is unrelated.
2	Mostly generic self-description such as 'confident, hardworking, positive' with little personal context.
4	Provides basic personal context - current role, interests, background or aspiration - but limited reflection.
6	Gives specific personal information and shows some understanding of what matters to her or how she sees herself.
8	Presents a grounded, distinctive and coherent sense of self using specific personal context without self-glorification.

Fairness guardrail: Do not reward prestigious education, profession, city, family background, achievements, or social status.

5.2 Goal clarity & direction - 4 marks

Level	Evidence descriptor
0	No future goal stated or response is off-topic.
2	Vague ambition such as 'I want success/fame/happiness' without direction.
4	A clear goal is stated, but motivation, path or current action is limited.
6	Clear goal plus meaningful reason and a realistic direction or next step.

Level	Evidence descriptor
8	Clear and personally meaningful goal, reason, current effort/next steps, and realistic understanding of how she may progress.

Fairness guardrail: Do not rank professions. Acting, entrepreneurship, teaching, sport, family goals, arts, public service and other legitimate goals can all score equally.

5.3 Purpose for joining Miss Ananti India - 4 marks

Level	Evidence descriptor
0	No meaningful reason for joining.
2	Mainly title, fame, followers, exposure or vague dream with no further substance.
4	General reason such as confidence, growth, opportunity or inspiration, but limited personal connection or contribution.
6	Specific personal reason for joining and a clear idea of what she hopes to develop, represent or contribute.
8	Strong personal motivation, clear understanding of the platform, realistic contribution, and connection between the opportunity and her own direction.

Fairness guardrail: Career opportunity is not a negative. It becomes limited evidence only when the response contains no broader understanding of participation, growth or responsibility.

5.4 Clarity & structure of communication - 3 marks

Level	Evidence descriptor
0	Speech/transcript is unusable or response does not address the prompts.
2	Meaning is difficult to follow; ideas are disconnected or largely off-topic.
4	Generally understandable and relevant, but repetitive or loosely organised.
6	Clear, relevant and reasonably structured; ideas connect logically.
8	Very clear, concise and coherent; communicates meaning effectively without unnecessary complexity.

Fairness guardrail: Do not score grammar, accent, vocabulary sophistication, English fluency, or speaking speed as merit if meaning is understandable.

5.5 Personal specificity & voice - 4 marks

Level	Evidence descriptor
0	No identifiable personal content.
2	Mostly stock phrases or generic pageant language that could apply to almost anyone.
4	Some personal details or motivations are present, but much of the response remains generic.
6	Responses are clearly rooted in her own goals, experiences or motivations.
8	Consistently specific and personally grounded across prompts; distinctive without needing dramatic achievements.

Fairness guardrail: Common answers are not weak by default. A common goal can score highly if the reasoning and personal connection are specific.

5.6 Composure & task engagement - 2 marks

Level	Evidence descriptor
0	Does not meaningfully complete the task.
2	Completes only limited parts or repeatedly loses the task; content is difficult to obtain.
4	Completes the task despite noticeable nervousness or hesitation.
6	Engages with all prompts and remains reasonably focused, with normal pauses or minor hesitation.
8	Focused, natural task completion; handles pauses or small mistakes and continues without losing the response.

Fairness guardrail: Do not infer confidence/personality from eye contact, facial expression, hand movement, soft voice, disability, or cultural communication style.

6. Prompt-to-parameter evidence map

Prompt	SA	Goals	Purpose	Clarity	Personal voice	Composure
Introduce yourself	Primary	-	-	Secondary	Primary	Secondary
Future goals	Secondary	Primary	-	Secondary	Secondary	Secondary
Why Miss Ananti India?	Secondary	-	Primary	Secondary	Primary	Secondary

The introduction is primarily context and self-awareness evidence. Future goals and 'Why Miss Ananti India?' should carry the strongest merit evidence because they reveal direction and purpose.

7. AI processing design

- Step 1 - Transcribe the audio/video using a supported speech-to-text pipeline.
- Step 2 - Score content parameters mainly from the transcript: self-awareness, goals, purpose, clarity and personal specificity.
- Step 3 - Score only task-level observable delivery from the recording for composure/task engagement.
- Step 4 - For every scored parameter, return: evidence level, a short supporting evidence phrase, and any non-scoring flag.
- Step 5 - Backend converts levels to marks and sums the six parameters to a maximum of 20.
- Step 6 - Store video transcript, rubric version, model version, evidence phrases, levels, marks and decision history.

No score without evidence. Each parameter score must be supported by a phrase or observable fact from the contestant's response.

8. Prohibited judging factors

The AI must not increase or decrease merit because of:

- Facial attractiveness, facial symmetry, skin tone or complexion.
- Height, weight, body shape or perceived fitness.
- Makeup, hairstyle, clothing style/cost or jewellery.
- Room/background, camera quality, phone model or perceived wealth.
- City, State, caste, religion, family background, college or employer prestige.
- Accent, grammar, English fluency, vocabulary sophistication or speaking speed, provided meaning is understandable.

- Extroversion versus introversion, eye contact, hand movement, facial expression, soft voice or normal nervousness.
- Follower count or social popularity - social presence is already scored separately.

9. Non-scoring flags

Flag	Use
VIDEO_TECHNICAL_FAILURE	Audio/video quality prevents fair assessment; provide defined retry/resubmission path.
PROMPT_NOT_ANSWERED	One or more prompts are substantially unanswered.
TRANSCRIPT_LOW_QUALITY	Speech recognition is too uncertain for reliable content scoring.
POSSIBLE_HEAVY_READING	Optional verification flag only; do not deduct automatically.
POSSIBLE_TEMPLATE_RESPONSE	Optional verification flag only; do not deduct automatically.
CONTENT_SAFETY_REVIEW	Harmful or prohibited content requires review under published rules.
SCORING_DISAGREEMENT	Independent AI passes differ beyond the defined tolerance.

10. Recommended structured AI output

Example schema (backend calculates marks):

```
{
  "candidate_id": "MAI_000123",
  "video_rubric_version": "VIDEO_V1",
  "levels": {
    "self_awareness_identity": 6,
    "goal_clarity_direction": 8,
    "purpose_for_joining": 6,
    "clarity_structure": 6,
    "personal_specificity_voice": 6,
    "composure_task_engagement": 4
  },
  "evidence": {
    "self_awareness_identity": "Connects current studies and personal interest to how she describes herself.",
    "goal_clarity_direction": "States a specific long-term goal and current steps toward it.",
    "purpose_for_joining": "Explains personal growth objective and a specific contribution she wants to make."
  },
  "flags": []
}
```

11. Engineer test cases

Test case	Expected behaviour
Strong content, simple English	Should score strongly when meaning, purpose and direction are clear. Grammar must not reduce merit.
Highly polished but generic	Should not receive high personal voice/purpose marks simply because delivery is polished.
Nervous but thoughtful	Normal hesitation should not materially reduce content scores; composure can still be adequate/strong if task is completed.
Small-town / ordinary background	Must receive the same opportunity for full marks as a candidate with elite education or professional exposure.
Career-focused motivation	Can score well if the candidate gives a specific, responsible reason; career ambition itself is not a negative.

Test case	Expected behaviour
Common future goal	A common goal can receive full marks if motivation, personal connection and direction are specific.
Weak audio / technical issue	Do not assign low merit because of technical failure; flag for retry or review.
Very attractive / professionally shot video	Appearance and production quality must not influence merit scores.

12. Final scoring formula

Video score (out of 20) = (SA level/8 x 3) + (Goals level/8 x 4) + (Purpose level/8 x 4) + (Clarity level/8 x 3) + (Personal Voice level/8 x 4) + (Composure level/8 x 2).

Overall Round 1 score = Written 40 + Social Presence 20 + MCQ 15 + Authenticity 5 + Video 20 = 100.

13. Recommended production rule

Primary principle: The AI is not judging whether the contestant 'looks like a beauty queen.' It is judging only the evidence she demonstrates in the assigned video task: who she is, where she wants to go, why she wants to join, how clearly and personally she communicates, and whether she can complete the task.

For testing: Use a diverse multilingual pilot set scored independently by experienced judges, compare AI evidence levels against the human rubric, and freeze the rubric, prompt and model version before production.
